## **1. INTRODUCTION**

A digital audit in higher education is a comprehensive evaluation of an institute's digital assets and performance to help identify areas for improvement. In the digital landscape, higher education institutions rely heavily on their IT infrastructure to support Teaching-Learning process, administrative functions, academic research and the overall student experience. As technology becomes more integral to the higher educational institutions, ensuring the reliability, security, and efficiency of IT systems is paramount.

ICT tools and infrastructure create interactive teaching-learning environment that helps both the teachers and students to engage themselves in activities leading to conducive atmosphere. The performance of the students can be effectively gauged using the digital tools and techniques. A 24x7 Internet connectivity enables the students to access online resources effectively.

One of the most effective ways to achieve the above is by conducting regular digital audits and assessments. This report brings out the objectives, facilities and the analysis of the impact made by the existing IT infrastructure on the stakeholders of The Gandhigram Rural Institute (Deemed to be University), Gandhigram.

## **2. OBJECTIVES OF DIGITAL AUDIT**

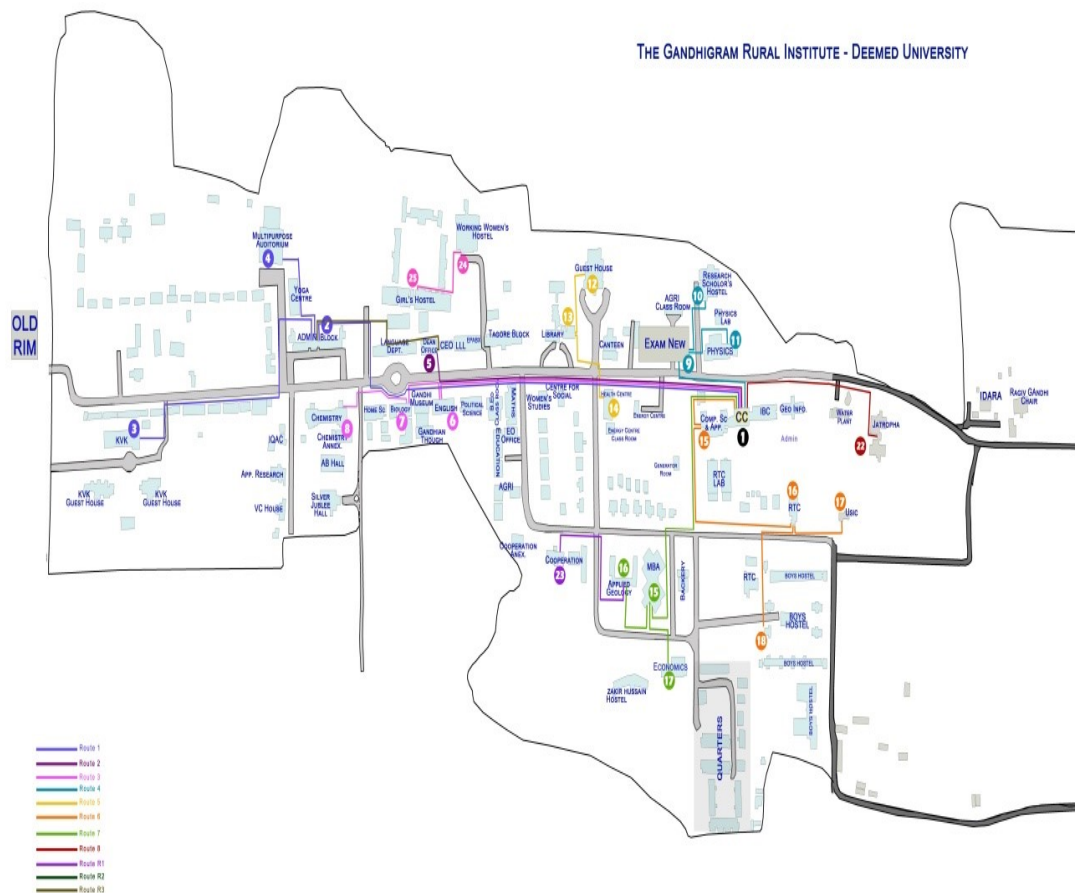

The following are the objectives of the digital audit:

- To enhance Teaching-Learning process
- To improve students' assessment
- To assess the availability of online resources for research
- To analyse the existing administrative tools and their satisfactory level
- To evaluate the existing ICT infrastructure of the institute and suggest improvement
- To monitor the existing Surveillance system in the campus

### 3. DIGITAL INFRASTRUCTURE IN THE INSTITUTE

#### 3.1 Internet facilities

National Knowledge Network (NKN) through BSNL provides 1G tunnel from Dindigul from 2015 onwards to our Institute. The Campus LAN connects more than 800 nodes in all the departments and sections by means of 3 Kilo meters of Optical Fibre Cable (OFC) and UTP cables. SOPHOS firewall is maintained by the Computer Centre to protect the network from unauthorized access and malicious traffic by monitoring and filtering the network traffic. All the internet users (staff and students) are provided with individual username and password for accessing the network through firewall. An exclusive Internet Browsing Centre (IBC) with 30 nodes is available for the use of students and staff members. The average network speed we are receiving is 400 Mbps. As a backup for load balancing, we got a second connectivity (Gold 1:1 – 100 Mbps) from Railtel Corporation of India Limited from October 2020 onwards. The following is the Campus LAN diagram of our campus.

### 3.2 WiFi facilities

With the available wired connectivity, Wi-Fi devices are also installed in our campus. 89 midrange indoor and outdoor Wi-Fi devices and 2 RF connectivity devices are available. The same credentials for wired connectivity can be used in Wi-Fi connectivity also.

### 3.3 Available ICT facilities/infrastructure in the Campus

A total number of 61 classrooms/ seminar halls/ laboratories/ libraries/ Video Conference Halls are equipped with LCD projectors, speakers, digital cameras, smart screens and other utility devices to facilitates ICT enabled teaching-learning process. These classes are fully furnished with electrical equipment to support the Digital Infrastructure.

## 5. ANALYSIS OF SATISFACTORY SURVEY FROM THE STAKEHOLDERS

A satisfactory survey from the stakeholders was conducted among the permanent teaching/non-teaching staff, research scholars, students and parents through Google Forms. Appropriate questionnaires were developed to elicit the data to assess the satisfactory index of the above stakeholders and the results were analyzed and are presented in the form of bar and pie charts.

### 5.1 Survey from the Students

For the permanent teaching staff, questions were designed to ensure the internet facility provided, functionality of the student's portal, working efficiency of online fee payment system, the awareness of the list of courses offered under

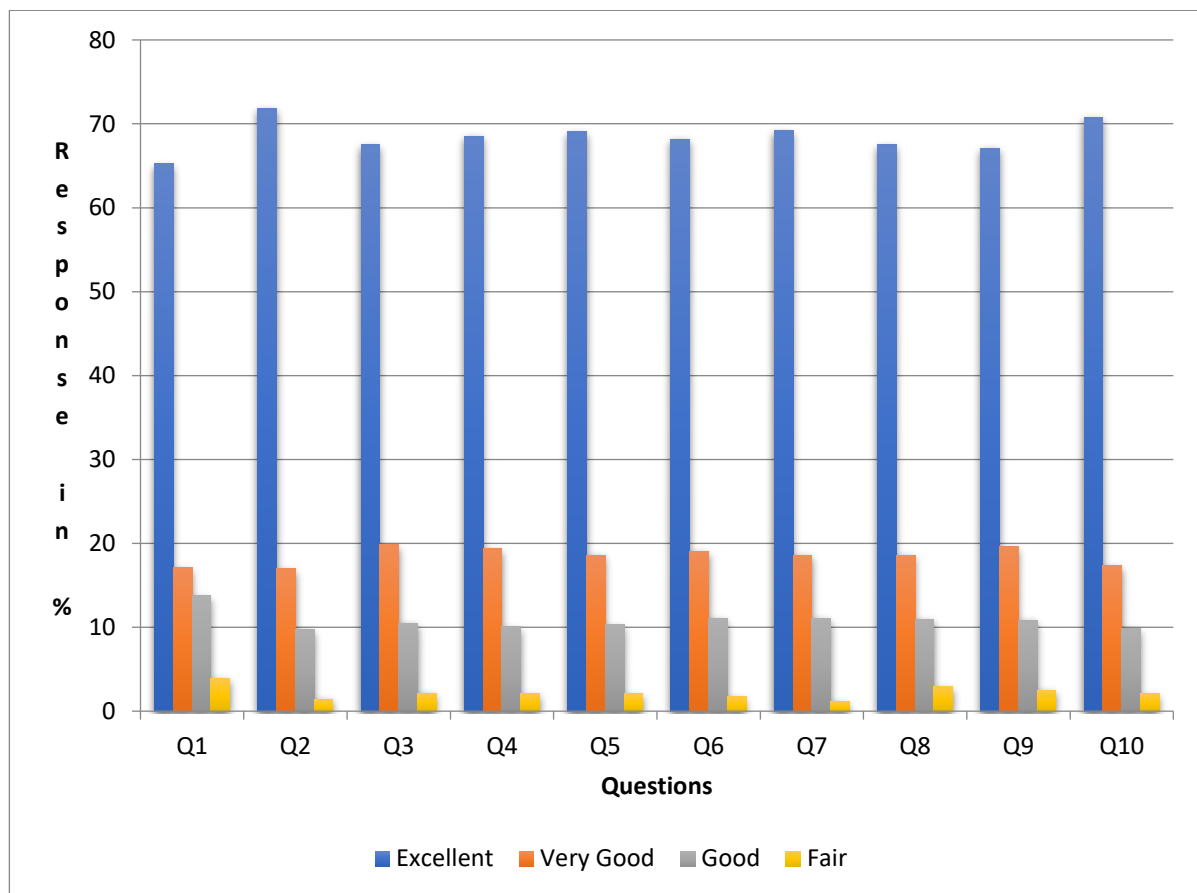

VAC, Skill-based Electives and Generic Electives, promptness levels of e-circulars and notification, enrolment on inline courses, ICT facilities in the department and availability of e-resources as shown in Table.1. 1924 number of students responded. The collective response is depicted in Figure 1 and the response to the individual questions varied from person to person, where the overall response is given in Figure 2.

## 6. ACTION TAKEN REPORT

S.No.	Resources	Observation	Action Taken
1	Computing facility	Good	Respective Departments/Section are asked to generate funding to increase computational facilities.
2	ICT infrastructure	Good	Needy Department are requested to improve the ICT facilities
3	Internet service	Good	Request made to increase the internet bandwidth
4	Student Portal	Very Good	<ul style="list-style-type: none"> <li>Additional features like student email ID is requested</li> </ul>

			<ul style="list-style-type: none"> <li>Exclusive mobile app of the student and scholars of GRI is being developed</li> </ul>
5	Staff Portal	Very Good	Request made to enable mobile access to attendance system
6	Research Tools	Good	Annual subscriptions to Grammarly and Plagiarism checking tool iThenticate need to be renewed promptly

## 7. CONCLUSION

It is observed that the existing digital services offered and the infrastructure available in the institute are sufficient for the teaching-learning process and the administrative activities of the institute as such. However, for the research and collaborative activities need to be augmented with additional resources in terms of computing and storage along with the increased internet bandwidth. The necessary tools for documentation (like Grammarly) and plagiarism checking will improve the standards of research. Additional ICT facilities to the needy department/section will augment the existing infrastructure with better access and utilization.
